

STATE AUTHORITY WORKSHEET

State Ownership and Mutation Map

Separate accessibility, legitimate readership, write authority, persistence, and restoration for one state value.

Separate accessibility, legitimate readership, write authority, persistence, and restoration for one state value. Use one identified candidate, system, operation, or decision per copy so the record remains reviewable.

USE THIS RESOURCE WHEN

- Use one copy per state value when several systems can read or mutate shared state.
- Ownership, evidence, or decision authority must be explicit.
- Another person must be able to review or reproduce the result.

How to use it

Separate accessibility, legitimate readership, write authority, persistence, and restoration for one state value. Use one identified candidate, system, operation, or decision per copy so the record remains reviewable.

HOW TO USE IT

- 1 Identify the exact subject and baseline before filling the working sections.
- 2 Separate verified facts from assumptions and unresolved questions.
- 3 Link evidence to the candidate, build, version, or decision it actually supports.
- 4 Record an accountable decision, owner, and next trigger before closing the document.
